

SEYMOUR EPSTEIN: Cognitive, Experiential, Self Theory and Research in Emotional Intelligence

FRIDAY, SEPTEMBER 14 10:00-12:00 and 1:30-4:00 Omni Bayfront Hotel, Corpus Christi, Texas

Dr. Epstein is professor emeritus at the University of Massachusetts and an eminent international scholar and researcher. His integrated theory of personality, Cognitive, Experiential, Self Theory (CEST), is research derived and is the most significant current theory of human behavior. His concept of constructive thinking and his measure of experiential intelligence, the Constructive Thinking Inventory, have major value in psychological and educational research. Professor Epstein will present an overview of CEST (two-hour seminar) and an afternoon EI research symposium on suggested research directions in emotional intelligence. The afternoon sessions will focus on the educational applications of CEST and suggested research directions in the area of emotional intelligence and health psychology.

I would like to invite professional colleagues and researchers interested in EI centric assessment and intervention programs to join us for the symposium with Professor Epstein. I would like to issue a special invitation to graduate and doctoral students. I have learned most from the research and writings of Professor Epstein, and this will be a special and valuable learning experience for those of us interested in integrated theories of human behavior and research in emotional intelligence.

The afternoon seminars will be informal and interactive. The specific focus is on needed research in emotional intelligence and suggested research designs and methodology. The symposium is limited to fifty participants. I hope that you will join me for this exceptional learning experience and help me make Professor Epstein comfortable and welcome in South Texas.

Warmest Personal Regards,

Darwin B. Nelson, Ph. D.
Professor of Educational Leadership
and Consulting Psychologist
Texas A&M University-Kingsville

Registration: \$200.00: Make Checks Payable to EI Research Initiative/ TAMUK, Department of Educational Leadership and Counseling, MSC 223, 700 University Blvd., Kingsville, Texas, 78363.
